PROFESSIONAL SUMMARY

Aspiring Frontend Web Developer pursuing a B.Tech in Computer Science and Engineering, with hands-on project experience building responsive, user-friendly, and interactive web interfaces using HTML, CSS, JavaScript, and React.js. Familiar with API integration, JSON data handling, reusable components, debugging, Git/GitHub workflows, Webpack, and deploying projects with Vercel. Eager to contribute to a development team while continuously strengthening frontend and full-stack skills.

TECHNICAL SKILLS

Frontend:	HTML5, CSS3, JavaScript, React.js, Responsive Web Design
Tools & Deployment:	VS Code, Git, GitHub, Webpack, Vercel
Currently Learning:	MERN Stack, Node.js, Express.js, MongoDB

PROJECTS

NewsMonkey – React News Application

Built a React-based news interface that fetches and displays news from the NewsData.io API. Worked with JSON responses, dynamic article rendering, reusable news-item components, and next-page token pagination.

Apple Store Clone

Created an Apple-inspired storefront using HTML, CSS, and JavaScript, with responsive product sections, navigation, product cards, interactive elements, and product links.

TextUtils – Text Utility App

Developed a React utility app with text transformations, word and character counting, extra-space handling, and copy-to-clipboard functionality.

AirPods Product Landing Page

Designed an Apple-style product landing page with video-background sections, product cards, pricing, navigation, and call-to-action links.

Interactive E-commerce Storefront

Worked on a responsive storefront concept focused on product exploration, customization, comparison, and cart-oriented interactions.

CORE STRENGTHS

Responsive UI Development | Component-Based Architecture | Troubleshooting & Debugging | Version Control (Git) | Deployment Workflows | Continuous Learning

EDUCATION

B.Tech in Computer Science and Engineering (CSE) — Expected completion: 2027
